Phase 7 - High Street to Womanby Street

Anticipated Duration: June 2026 – August 2026

Phase 4 - 2 Kingsway

Anticipated Duration: September 2026 – October 2026

Castle Street - Westbound

The westbound side of Castle Street will be upgraded throughout its length with renewed footways featuring new granite paving and improvements to pedestrian crossing points to enhance safety and accessibility.

Bus infrastructure will be upgraded, including revised bus stops and shelters. Additional works include drainage and ducting upgrades, enhancements at the Cardiff Castle entrance, and modifications at various junctions to support pedestrian, cyclist and vehicle movements. A localised bus lane closure will be in place, while pedestrian access and business entrances are maintained at all times. For major events, all works and equipment will be temporarily removed in coordination with Cardiff Council.

These improvements support safer and more accessible walking and bus travel along this key corridor as part of the wider Castle Street scheme.
